NVD Driving Exam: Answer Key

AN/PVS-14 · M1075A1 PLS · AR 600-55 · TC 21-305-2 · AR 385-10 · TC 21-60

#	Ans	Correct answer	Source
1	**A**	Army Driver and Operator Standardization Program	Vid 1
2	**C**	Be licensed on the M1075A1	Vid 1
3	**D**	On the operator license record, DA Form 5984-E	Vid 1
4	**B**	TC 21-305-2	Vid 1
5	**B**	False	Vid 1
6	**A**	40 degrees	Vid 1
7	**D**	Diopter, then objective focus	Vid 1
8	**C**	Shine a flashlight into the objective lens to test it	Vid 1
9	**B**	Wash out the image and ruin the unaided eye's dark adaptation	Vid 1
10	**D**	Driving faster than you can stop within the distance you can detect hazards	Vid 1
11	**A**	Keep the increased interval from the convoy brief	Vid 1
12	**C**	Look away, hold your lane, and slow down	Vid 1
13	**B**	Also wear NVDs, call hazards, and watch the right side	Vid 1
14	**D**	A tactical vehicle backs up	Vid 2
15	**C**	At the driver's-side rear corner, visible in the driver's mirror	Vid 2
16	**A**	Stop immediately and wait	Vid 2
17	**B**	Two flashlights with filtered lenses or lighted wands	Vid 2
18	**A**	Only people looking through NVDs	Vid 2
19	**C**	Directly behind the flatrack	Vid 2
20	**D**	Anyone who sees a hazard	Vid 2
21	**B**	Large, slow, and inside the driver's view	Vid 2
22	**A**	Bloom and wash out the image	Vid 2
23	**D**	So you can still see if the device fails or for the mirrors	Vid 3
24	**C**	30 minutes or more	Vid 3
25	**B**	It must be accounted for by serial number at all times	Vid 3
26	**D**	Hold the wheel steady, slow down, tell the crew, and stop safely	Vid 3

27	**C**	Both A and B	Vid 3
28	**A**	Follow the driver rest plan, rotate drivers when allowed, and speak up	Vid 3

Short answer

29. List three things the driver and ground guide agree on in the brief before moving.
Any three: signals; type of light (filtered visible or IR); which side the guide works from; that the route is walked first; what to do if a light fails or sight is lost (driver stops).

30. Explain why following distance and closing speed are hard to judge on the PVS-14, and what you do about it.
Monocular = poor depth perception (one eye, no binocular cues). Increase interval per convoy brief, use IR markers, reduce speed, never tailgate.

Scoring suggestion: 1 point each for 1–28, 3 points each for 29–30 (total 34). Set the pass mark per unit SOP.
